FIBIN

MERN Stack Developer

Calicut, India | 7907238198 | fibinkunnath@gmail.com **| LinkedIn | GitHub**

PROFESSIONAL SUMMARY

FullStack Developer with hands-onexperience building and deploying web applications using React.js, Node.js, Express.js, and MongoDB. Developed two major applications during a Full Stack Developer internship: an e-commerce platform and a student management system. ExperiencedinREST API development, authentication and role-based authorization, CRUD operations, database integration, email services,data import/export, debugging, testing, and production deployment.

TECHNICAL SKILLS

Languages: JavaScript,HTML, CSS

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js, RESTAPIs,CRUD Operations, Middleware, Routing

Database: MongoDB, Mongoose

Authentication: JWT, Authentication,Role-Based Authorization, Password Hashing

Tools & Services: Git, GitHub, Postman,Vercel, Render, Brevo

Other: Excel Data Import/Export, PDFExport, API Integration, Debugging, Testing

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | BridgeonITSolutions | Apr 2025 – Present

- Developed two major full-stack webapplications independently using the MERN stack: Sole Society, an e-commerce application, and EduTrack, a student managementsystem.
- Built REST APIs with Node.js andExpress.js and integrated them with React.js frontends and MongoDB databases.
- Implemented JWT-based authenticationand role-based authorization with separate permissions for administrators and regular users.
- Developed e-commerce functionality including product CRUD, cart, orders, wishlist, and product categorization.
- Developed student management functionality including student, teacher, class, and division management, attendance, reports, and events.
- Implemented email verification and email delivery; troubleshot production email issues and migrated from Nodemailer to Brevo.
- Implemented Excel data import/export and PDF export functionality for the student management system.
- Deployed frontends on Vercel and backends on Render; used Git/GitHub and debugged frontend, backend, API, and production issues.

PROJECTS

Sole Society — Full-Stack E-Commerce Platform | | React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT **Live Demo**

- Built product CRUD, cart, orders, wishlist, and product categorization features.
- Developed REST APIs and integrated the React.js frontend with the Express.js backend and MongoDB.
- Implemented JWT authentication, role-based authorization, password hashing, and email functionality.
- Deployed the frontend on Vercel and backend on Render.

EduTrack —StudentManagement System | | React.js, Node.js, Express.js, MongoDB, JWT, Brevo**Live Demo**

- Built student, teacher, class, and division management along with attendance, reports, and events.
- Developed and integrated REST APIs using React.js, Node.js, Express.js, and MongoDB.
- Implemented email verification with Brevo, Excel data import/export, and PDF export.
- Applied authentication, password hashing, API testing, debugging, and deployment practices.
